

Proceq preannounces move into new market

Swiss-based Proceq will reveal new flaw detection solution in June

Schwerzenbach/Switzerland, April 22, 2016 – Global leader in portable measurement solutions for non-destructive testing, Proceq, has today preannounced that the company will shortly be entering the flaw detection market with a new solution.

Its advanced features will not only appeal to Proceq's existing partners and customers, but also attract business from new ones. The company has a diverse client-base operating across many sectors, including the oil & gas, aerospace, energy, metal production & processing and automotive industries.

Preliminary information will be released to distributors at the 2016 Control Exhibition in Stuttgart later this month. The official global launch will take place during June, at the 19th World Conference on Non-Destructive Testing (WCNDT) Exhibition in Munich, Germany.

Dr. Ralph Mennicke, Proceq CEO said: *"Our new and exciting product will come with the usual Proceq quality, service and global distribution. So, our message to those used to the Proceq package, support and service is quite clearly – wait for a couple of months and take advantage of Proceq flaw detection technology."*

Marcel Poser, Proceq Executive Chairman and Tectus Group CEO commented: *"Using experience gained with Proceq's very successful Equotip and Pundit brands and by leveraging their strong market position, the company is now breaking out into new fields. Major investment and diversification will continue in the Proceq portfolio, with still more exciting new NDT products set for launch this year."*
