

Equotip 550 Portable Rockwell

Fast hardness inspection on thin walled metal pipes

Proceq's Equotip 550 Portable Rockwell enables the inspector to carry out a true hardness indentation test directly on thin walled pipes (< 20 mm) without having to cut and send samples to the testing lab. The test procedure is light, practical and repeatable - and more effective than other instruments on the market. The instrument converts the depth of penetration to the chosen hardness scale (e.g. HRC, HB or HV).
