

Equotip 550 Portable Rockwell

Designed for measuring small components **REMOVE**

Equotip 550 Portable Rockwell is perfect for measuring small and thin samples due to smaller indentation compared to traditional bench top hardness testers. In the picture here, the Equotip 550 Portable Rockwell PC unit with a measuring clamp is used to check the hardness of a circlip made of carbon spring steel at a hardness value of 44 to 52 HRC after heat treatment.
