

Equotip 550 Portable Rockwell

Hardness testing of hydraulic cylinders

Proceq's Equotip 550 portable hardness testers have been utilized for checking hydraulic cylinders in prime movers. Hardness measurement is one of the vital parameters in producing high quality hydraulic cylinders. Thanks to the high accuracy and repeatability of the Equotip 550 our customers are able to reliably track the quality of the parts through the different manufacturing steps and optimize the production process.
