

Equotip 550

Ideal hardness tester for steam turbine generators

Proceq's Equotip 550 portable hardness testers are utilized for checking pipes and welding points as they are able to provide crucial information on the mechanical properties, quality of the material and workmanship.

The versatility of the Equotip 550 platform makes the difference in such applications as it offers the ideal solution for every need. In this case, the UCI method addresses the heat affected zone problematics while the Leeb method was used to monitor the heat treatment process.
