

Equotip 550 Leeb

Hardness testing in oil & gas, marine and shipping industries

Thanks to their portability, simple operation and high accuracy, Equotip portable hardness testers are proving to be handy instruments for checking the hardness of incoming raw materials and finished goods for quality control purposes. The Equotip Leeb Impact Device D is used to check the hardness of various components such as pipes, valves or flanges. The device is used by customers in industries such as oil & gas, marine and shipping.
