

Pundit 200 Pulse Echo and Pundit 250 Array

Finding voids with ultrasonic inspection during and after the installation of wall cavity insulation beads

Proceq's Pundit 200 Pulse Echo and Pundit 250 Array are quick and easy-to-use instruments for establishing the distribution of insulation beads in wall cavities. Furthermore, the instruments offer a non-destructive way of finding any gaps or voids during and after completion.
