Press Release

Proceq preannounces launch of new Pundit model

Swiss-based Proceq on track to launch new ultrasonic array detection solution

Schwerzenbach/Switzerland, October 13, 2016 – Global leader in portable measurement solutions for non-destructive testing, Proceq, has today preannounced that the company will shortly be launching a new ultrasonic detection solution aimed primarily at the concrete testing market.

The new device will be part of Proceq's well-established and highly successful Pundit ultrasonic range of detection equipment. The new configurable multi-channel array system will offer end-users greater flexibility, ease of use, immediate and on-going real-time measurement – and will be substantially faster and more accurate than any other standard equipment currently available on the market. The options of this new system will help customers to maximize their investment.

Be the first to use the new technology and sign up for future information on the new Pundit array detection product offering: www.proceq.com/site/contact.html.

Proceq CEO Ralph Mennicke said: *"This new product will revolutionize ultrasonic testing on concrete structures and specimens, as we will exploit its full potential over the next years to engage expert and NDT user communities. Concrete scanning will for the first time also be efficient and fast with ultrasonic test equipment. At the same time, it will combine Proceq's quality, service and global distribution standards."*

Marcel Poser, Proceq Executive Chairman and Tectus Group CEO commented: *"Proceq has built up considerable knowledge in ultrasonic testing of concrete since the acquisition of CNS Farnell in 2009. Major investments in Proceq and Tectus R&D continue and further advanced NDT products are expected to be added to the Proceq portfolio over the next 12 months."*

About Proceq SA

Proceq of Switzerland was founded in 1954 and is a leading manufacturer of high quality portable testing solutions for many different industries. The company's strong research and development team at its headquarters in Switzerland continues to create Swiss-manufactured products which feature latest technology and set industry standards. With subsidiaries in North and South America, United Kingdom, Russia, the Middle East, China and Singapore, the company provides its international customers with excellent local support. Proceq is part of the Tectus Group. www.proceq.com

About Tectus Group

The Tectus Group and associated companies is a family-owned multi-national business with headquarters in Zurich, Switzerland. The company has diverse investments and operations across six market segments: engineering & construction, IoT & sensing, digital health, entertainment & lifestyle, advisory & investments and real estate. No matter what their specialist area or territories covered, all of the organizations share the goals of being best-in-class and setting new benchmarks. www.tectusgroup.com

About Tectus Dreamlab PTE LTD

The Tectus Group established Tectus Dreamlab Pte Ltd in Singapore in November 2015, to focus on cutting-edge, cross-functional research. At the new, state-of-the-art facility in Fusionopolis, the Tectus Dreamlab team works on cross-disciplinary R&D projects that leverage existing expertise within the Tectus Group, combined with the novel technologies and capabilities of various research platforms in Singapore. While the Tectus Group has enjoyed a long successful heritage in Singapore, Tectus Dreamlab is the Group's first R&D-focused strategic investment in the city-state. It is the second such hub for the Tectus Group and complements its existing facility in Switzerland.
