Fully integrated Rebar Detector

Get the most trusted instrument for rebar detection, cover depth and rebar diameter measurements.

The challenge
Concrete structures contain reinforcement bars to strengthen the construction. The Profoscope instruments are used to accurately determine the location of rebars and their cover depth beneath the surface. The instruments can also assess the rebar diameter. The Profoscope’s rebar detection function and its capability of separating rebars which are located close to each other are groundbreaking.

The Profoscope Solution
Profoscope has a unique real-time rebar-visualization, allowing the contractor to actually “see” the location of the rebar beneath the concrete surface. This is coupled with rebar-proximity indicators and optical and acoustical locating aids.

The Profoscope+ has all the features of the classic Profoscope. In addition, the instrument can record measurement data, manually or automatically. This increases testing efficiency on the construction site significantly. The included software tool allows post-processing or exporting of the collected data.

Benefits to the Customer

Versatility; rebar location and orientation, cover measurement and rebar diameter assessment all provided by a single, fully integrated, cordless instrument.

Ease of use; the intuitive user interface and the real-time visualization of the rebars make the instrument very easy to use.

Durability; Sealed housing for use in rough environment with replaceable protection cover for long lasting performance, over a wide temperature range.

Memory functions (Profoscope+ only); Two different modes of operation are supported:
1. Manual data storage allows the user to save concrete cover and rebar diameter on individually chosen spots.
2. Automatic data storage is especially designed for surface scans. Every time a rebar is detected, the cover value is stored automatically.

Data export and analysis (Profoscope+ only); The ProfoLink software offered by Proceq is a professional tool to analyze the measurement results.
The Profoscope is designed for single handed operation. All functions can be programmed/activated using the two function keys and the navigation. The instrument is compact, light and robust. This makes it suitable for use on a construction site.

1 Display 5 LED indicator
2 Navigation 6 Function key
3 Reset key 7 On/off button
4 Center of probe 8 Battery compartment
9 Center line

**Real-time Visualization of Rebars**

The Profoscope makes rebar location faster and simpler than ever before. A rifle scope shows the position of the rebar beneath the instrument in real time. Every Profoscope is supplied with a start-up test kit as standard. This kit allows the user to familiarize him/herself with the operation of the instrument.

**Icon Based Menu System**

The menus are designed with intuitive icons to make the Profoscope language independent.

- Regional Setting
- Audio Setting
- Memory Setting *
- Reference Rebar Diameter
- Neighboring Bar Correction
- Measuring Range
- Minimum Cover Alert

* Profoscope+ only

**Test Kit**

Locating a rebar

Made in Switzerland
Measuring Range

This graph shows the maximum possible measuring range for the Profoscope, compliant with BS1881 part 204. Please note: This is based on a single rebar with sufficient clearance to neighboring rebars.

The Profoscope is calibrated for measurements on non-stainless steel rebars fastened with binding wires only.

When measuring on welded meshes the displayed values must be corrected.

Note: The rebar diameter can be measured up to a cover of 64mm (2.5 inch).

Advanced Features of Profoscope+

Manually recording the measurements of a test series is time consuming and is an unnecessary source of error. With the various data storage modes of the Profoscope+, taking notes is not necessary anymore.

Memory Function and ProfoLink

The graphic display of the Profoscope+ shows all necessary information while acquiring data on site.

The collected measurement values can then be analyzed with the ProfoLink PC tool.
**Technical Information**

**Measuring Range**
See graph on previous page for maximum range relative to bar diameter.

**Power Supply**
- Power source: 2 x 1.5 V AA (LR6) batteries
- Voltage range: 3.6 V to 1.8 V

**Current Consumption**
- Power on, backlight off: ~ 50 mA
- Power on, backlight on: ~ 200 mA
- Sleep mode: ~ 10 mA
- Power off: < 1 μA

**Battery Lifetime**
- Backlight off: > 50 h
- Backlight on: > 15 h

**Time Outs**
- Sleep mode: 30 s
- Auto shut down: 120 s

**Environmental Conditions**
- Temperature range: -10º to 60º C (14º to 140º F)
- Humidity range: 0 to 100% rH
- Protection class: IP54

**Standards and Regulations Applied**
- BS1881 part 204; DIN1045; SN 505 262; DGZfP B2

**Data Storage (Profoscope+ only)**
- 49'500 measurements total (500 objects with 99 measurements)

**Compatibility ProfoLink:** Windows 2000, XP, Vista, 7, 8

**Ordering Information**

**Accessories**

**Standard Accessories delivered with the Profoscope / Profoscope+**
- 391 80 100 Canvas bag
- 350 74 025 Battery type AA
- 391 80 110 Carrying strap

**Additional Accessories delivered with the Profoscope+ only**
- 391 80 803 USB cable type A-mini B
- 391 80 111 Memory card microSD, 2GB
- 391 80 112 CD incl. ProfoLink

**Optional Accessories**
- 391 10 121S Self-adhesive protection covers (Set of 3)
- 390 00 270 Calibration test block
- 325 34 018S Chalk (Set of 10)

**Service & Warranty Information**

Proceq is committed to providing complete support for the Profoscope by means of our global service and support facilities. Furthermore, each Profoscope is backed by the standard Proceq 2-year warranty and extended warranty options.

**Standard Warranty**
- Electronic portion of the instrument: 24 months
- Mechanical portion of the instrument: 6 months

**Extended Warranty**
- 391 88 001 Additional 1-year warranty*
- 391 88 002 Additional 2-year warranty*
- 391 88 003 Additional 3-year warranty*

* An extended warranty of one, two or three years can be purchased at time of order or within 90 days thereafter.
